

I am writing to express my opposition to the FCC recording requirement. It is my opinion that the FCC is unfairly shifting the burden of enforcement to licensees. The FCC has not made a showing that the government itself could not record programs of interest through its field offices if required for its regulatory activities. This is an issue with a few and the majority of stations practicing high standards in broadcasting should not be punished. I have these concerns aside from the fact that this will be very expensive for my small market group, as well as present technical issues to ensure the equipment operates properly. I strongly urge the FCC to reconsider this position!
